FULL STACK DEVELOPER | AI ENGINEER

Motivated Computer Science undergraduate with strong experience in building scalable full-stack applications and AI-powered systems. Skilled in designing data-driven platforms, RAG pipelines, and real-time dashboards. Passionate about applying AI in domains like health-tech and analytics. Interested in building AI-driven health-tech solutions.

Education

B.Tech, Computer Science, Sitare University

Course Completion - May'27

Relevant Coursework: Data Structures & Algorithms, Machine Learning, DBMS, Web Development, Artificial Intelligence

GPA: 7.94

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, Java

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Flask

Databases & APIs: MySQL, MongoDB, PostgreSQL, GraphQL, Qdrant

Tools & Technologies: RAG Pipelines, NLP, Pandas, NumPy, Git, GitHub, BeautifulSoup

Specialization: RAG Pipelines, NLP, Vector Databases (Qdrant)

Projects

AI-Powered Q&A System for Sacred Texts

- Developed an AI-powered Q&A system handling multiple concurrent queries using semantic search and RAG
- Engineered a high-dimensional semantic search pipeline using Mistral embeddings and Qdrant vector database
- Improved query understanding and response relevance using NLP techniques

Tech Stack: Python, Flask, NLP, Qdrant, Pandas, NumPy

ZARA Interpreter Engine

- Built a custom scripting language interpreter with a complete execution pipeline including lexical analysis, parsing, and evaluation
- Implemented support for variables, arithmetic expressions, conditionals, and loops using object-oriented design
- Designed an Abstract Syntax Tree (AST) for structured execution and efficient interpretation
- Implemented error handling for syntax and runtime issues

Tech Stack: Java, OOP, Data Structures, AST, Parsing Techniques

LeetCode Student Progress Tracker

- Developed a full-stack web application tracking 100+ students with real-time performance analytics
- Designed interactive dashboards with heatmaps and charts for clear data visualization
- Built efficient GraphQL APIs for optimized data querying

Tech Stack: React.js, Node.js, PostgreSQL, Chart.js, Tailwind CSS, GraphQL API

AQI Website Analysis

- *Built a platform for real-time AQI monitoring and historical trend analysis using interactive maps and charts*
- *Enabled comparative analysis across multiple cities with dynamic visualizations*
- *Provided insights similar to real-world health monitoring systems*

Tech Stack: *JavaScript, Flask, HTML, CSS, Chart.js, Python, Pandas, AQI APIs*

Scholarships

100% B.Tech CS Scholarship, Sitare Foundation

Aug'24 - Present
