FULL STACK DEVELOPER | AI ENGINEER

Motivated Computer Science undergraduate with strong experience in building scalable full-stack applications and AI-powered systems. Skilled in designing data-driven platforms, RAG pipelines, and real-time dashboards. Passionate about applying AI in domains like health-tech and analytics. Interested in building AI-driven health-tech solutions.

Education

B.Tech, Computer Science, Sitare University

Course Completion - May '27

Relevant Coursework: Java Programming, Python Programming, Advanced Data Structures and Algorithms, Object Oriented Programming, Machine Learning, Database Management Systems, Web Applications Development, and Artificial Intelligence.

GPA: 7.94

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, Java

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Flask

Databases & APIs: MySQL, MongoDB, PostgreSQL, GraphQL, Qdrant

Tools & Technologies: RAG Pipelines, NLP, Pandas, NumPy, Git, GitHub, BeautifulSoup

Specialization: RAG Pipelines, NLP, Vector Databases (Qdrant)

Projects

AI-Powered Q&A System for Sacred Texts

Developed an AI-powered Q&A system handling multiple concurrent queries efficiently using semantic search and RAG. Engineered a high-dimensional semantic search solution using a Retrieval-Augmented Generation pipeline, incorporating Mistral AI embeddings and a Qdrant vector database. Improved query understanding and response relevance using NLP techniques

Tech Stack: Python, RAG Pipeline, Mistral Embeddings, Qdrant Vector DB, Flask, NLP, Pandas, NumPy

ZARA Interpreter Engine

Built a custom scripting language interpreter with full execution pipeline including lexical analysis, parsing, and evaluation, supporting variables, loops, and conditionals. Designed modular architecture using OOP principles.

Tech Stack: Java, OOP, Data Structures, AST, Parsing Techniques

LeetCode Student Progress Tracker

Developed a full-stack web application tracking 100+ students, enabling real-time performance analysis and improving visibility through interactive dashboards. Designed and implemented interactive dashboards featuring activity heatmaps and performance charts to provide clear visualization of student data. Built efficient GraphQL APIs for optimized data querying

Tech Stack: React.js, Node.js, PostgreSQL, Chart.js, Tailwind CSS, GraphQL API

AQI Website Analysis

Built a platform for real-time Air Quality Index monitoring and historical trend analysis using interactive maps and charts. Enabled comparative analysis across multiple cities with dynamic data visualization. Provided insights similar to real-world health monitoring systems.

Tech Stack: *JavaScript, Flask, HTML, CSS, Chart.js, Python, Pandas, AQI APIs*

Scholarships

100% B.Tech CS Scholarship, Sitare Foundation

Aug '24 - Present
